Lê Minh Vương

Address: Dictrict 6, Ho Chi Minh City, Vietnam
Number phone: 0987964904
Email: vuongledz04@gmail.com

Profile Summary: A final-year Software Engineering student with hands-on experience in various academic and personal projects. Eager to take part in real-world development environments to sharpen my skills and grow into a highly competent software engineer.

Work Experience

Warehouse Management

Time: Sep 2024 - Dec 2024 | Course Project

- Developed a web-based warehouse management system with features including warehouse creation, inventory tracking, product management, import/export operations, and reporting dashboard.
- *Team Project – 3 Members | Role: Fullstack Developer*
- Built the frontend using **ReactJS** with responsive design and user-friendly UI.
- Designed and implemented RESTful APIs using **Spring Boot** for backend services.
- Used **MySQL** for data storage and **Docker** for containerization and deployment.
- Integrated full CRUD operations for managing products and stock levels.
- Applied authentication and role-based access control for different user types.
- Collaborated via **GitHub** and followed Agile workflow for task division and version control.
- GitHub Repository: github.com/tnowad/warehouse-pro

Astra social media

Feb 2025 - May 2025 | Course Project

- Built a social media website with essential features including user authentication, account creation, post sharing, friend management, real-time messaging, and AI integration.
- Developed backend services using **Spring Boot**, focusing on scalable architecture and clean code practices.
- Designed and implemented secure authentication using JWT and BCrypt password encryption.
- Created RESTful APIs to handle posts, user profiles, friend requests, and private messages.
- Integrated **OpenAI API** for AI-powered features such as smart reply suggestions in chat.
- Utilized **MySQL** with **Hibernate** for efficient data mapping and relationship handling.
- Optimized database queries and implemented pagination, caching, and input validation to enhance performance.
- Supported frontend integration using **Vite + ReactJS** by ensuring consistent and well-documented API contracts.
- Actively participated in code reviews, issue tracking, and continuous deployment setup.
- Successfully deployed the frontend to **Netlify**, making the project publicly accessible at https://astrasocial.netlify.app
- GitHub Repository: github.com/akira3175/Astra-Social-Media

Java internship in Wisdom Telecom

Feb 2025 - May 2025 | Internship

- *Team: 5 Members, Role: Member*
- Gained valuable hands-on experience in enterprise-level Java development within a fast-paced telecom environment.

- Contributed to designing and implementing scalable backend services using **Spring Boot** and microservices architecture.
- Participated actively in code reviews and collaborated closely with senior developers to follow best practices and maintain code quality.
- Developed RESTful APIs integrated with third-party telecom services, enhancing system interoperability and customer experience.
- Improved application performance by optimizing database queries and applying caching strategies using **Redis**.
- Gained familiarity with CI/CD pipelines, automated testing, and agile development methodologies.
- Enhanced problem-solving skills by debugging complex issues and providing timely solutions under real-world constraints.
- Demonstrated strong teamwork and communication by working in cross-functional teams and participating in daily Scrum meetings.

Education

Sai Gon University - SGU

Software Engineer • 2022 - 2027

GPA: 3.40

Scholarships:

- Semester 1, Academic Year 2024-2025
- Semester 2, Academic Year 2025-2026

Skills

- **Languages Programming:** Java | Python | C# | C/C++ | HTML5/CSS/Javascript/Typescript
- **Framework:** Spring boot (Java) | ReactJS (Javascript)
- **Others**: OOP | Docker | Hibernate | SQL | NoSQL(MongoDB) | RESTful API | JWT | OAuth2 | UnitTest

Soft Skills

- **Teamwork:** Able to collaborate effectively in group projects and cross-functional teams.
- **Problem-solving:** Skilled in analyzing issues and proposing practical solutions.
- **Time management:** Able to prioritize tasks and meet deadlines under academic and project pressure.
- **Adaptability:** Quick to learn new technologies and adjust to dynamic project requirements.
- **Growth mindset**: Highly motivated to improve, always striving to better myself both professionally and personally.
- **Initiative & Commitment:** Proactively learn new technologies and contribute wholeheartedly to every project and responsibility.

Languages

English: Reading and understanding English documents
